

Emmanuel Payet

Personal Statement

Experimented software engineer specialized in web technologies, looking for a challenging job in London to develop my technical skills.

Rigorous and enthusiast programmer who can always be trusted to come up with a new approach. I use as much as possible agile methodologies in my work and personal projects. Productivity is fundamental to me, and I set my toolbox in consequence. I'm capable of handling every step of a project, but I also work well in a team.

During my free time, I study new technologies on many subjects. All of this makes me someone who tries to find the most effective solutions to computing problems.

Employment

2013–2015 **Software Engineer - Dual education**, *Cdiscount*, Bordeaux, France.

Created the developer hub (API documentation and app management) of the Cdiscount openAPI with public access.

Developed several internal projects in web technologies (single-page applications, RESTful servers, NoSQL databases).

Assured the correct implementation of agile methodologies, testing (TDD, integration tests, UI tests, etc.), automation (continuous integration and delivery, docker), and other good development practices (code review, pair programming, constant refactoring, etc.).

Started migration to microservices.

Active technological monitoring and organization of knowledge sharing workshops (e.g. coding dojos).

Trained a junior developer.

Technologies: OO JavaScript (ES6), AngularJS, NodeJS, MongoDB, Java, Kafka, Docker, Jenkins, git, linux, bower, gulp, karma, jasmine, protractor

Summer **Software Engineer - Internship**, *Personalized Software Ltd*, Dublin, Ireland.

2013–3 Months Sonar integration in the continuous integration process (Jenkins)

Worked on the core architecture of the project BidRight (Java)

Created a RESTful API (Java / Jersey)

Created a scraping web app (Python / Django)

2012–2013 **Software Developer - Dual Education**, *Cdiscount*, Bordeaux, France.

Developed in the web services team on different projects.

Created an internal application of web service monitoring (SOAP / REST) to ease management and use of web services on different environments (production, dev, etc.), which improved the team productivity.

Languages: C#, SQL Server, Silverlight

2012–3 Months **Web Developer - Internship**, *Ecobox*, Bordeaux, France.

Developed a Google Map module for Dynmap (cartography software)

Languages: PHP/MySQL, JavaScript/AJAX

Education

2010–2015 **EPSI (École Privée des Sciences Informatiques)**, Bordeaux, France.

Computer Science Engineering Top School, Master's degree

Relevant Modules: Web, Mobile, NoSQL, SOA, Agile Methodology, Software Architecture, Linux, AI, C/C++, Java, 3D

2007–2010 **Trois Mares High School**, Reunion Island.

High School diploma (French baccalauréat), Science, Engineering Science, with honours
French equivalent to A Levels

Skills

JavaScript ES5 & ES6, NodeJS, AngularJS, gulp, bower, karma, jasmine, protractor, cordova
Java Version 8, Maven, Gradle, Jersey, JUnit, Hibernate, Groovy, Spock, Kafka
Database MongoDB, ElasticSearch, Redis, PostgreSQL, MySQL
Operations Docker, Jenkins, Heroku, Travis
Linux Debian, ArchLinux, Ubuntu, Fedora
IDE IntelliJ Idea & derivatives, vim
Others C#, C/C++, Python, PHP, HTML, CSS, git

Projects

Languages

French Native
English Full professional proficiency

Interests

IT new technologies, coding dojos
Others video games, squash, Japanese animation
